Strong leadership skills

Hardworking

Quick learner

Team player

Strong understanding of typography

Layout & composition systems (grid systems)

Strategic thinking

Creative problem solving

Education

Bachelors of Design (Honors) OCADU

Work Experience

OCAD University Copy & Print: Senior Monitor January 2024 - May 2026

In my time at OCAD Copy & Print I became very familiar with Canon, Ricoh, Roland, Epson, Xerox and Kyocera printers. I was the head supply monitor in charge of restocking all campus wide devices as well as minor maintenance from September of 2024 until May 2026. My other main responsibility's were in print production, reviewing files and printing them off on various devices as well as finishing (trimming, binding etc). Other smaller responsibilities were pickup (cashier) inventory (excel) and help desk (customer service).

GMP Sportswear, Kitchener: Graphic Designer October 2021 - September 2025

I started at GMP in high school and this position is what got me into graphic design in the first place. In the beginning I started with preparing materials (vinyl, twill, embroidery, screen printing etc). As I learned more about design I started digitizing logos on CorelDRAW. After leaving the job briefly to attend university I returned with more responsibility, I was interacting with clients, creating new unique designs and apparel, preparing quotes, proofs and orders as well as designing web stores for clients.

Label OCAD: Co-Founder & Creative Director September 2024 - Present

Label OCAD is one of my proudest achievements. A peer and I started Label OCAD at the beginning of our third year at the school. What we built is truly something to take pride in, we created a whole new identity for the school with this project and have launched three successful releases to date. Together we covered everything from budgeting and design to finding and communicating with our manufacturers as well as all marketing for each release.
